ASC D40

INDUSTRIAL VACUUM CLEANER

The ASC Dragonfly 40 Heavy Duty Vac is a purpose-built Heavy Duty Industrial Vacuum that is designed to work in the worst environments possible.

The machine is Hand Built in Italy by the Global Vacuum leader Sibilia.

The Dragonfly 40 is a unique standalone product that takes mobile vacuuming to a whole new level.

This model D40 is the perfect fit for any large organisation looking for an all-in-one all-purpose built vac/sweeper.

The machine can be configured in diesel or electric powered versions.

The most popular Dragonfly 40 sold worldwide is the Diesel Powered 55.4 KW all-in-one UNIT.

- The machine can be mounted on a mobile platform (trailer or truck) or as a standalone machine.
- The D40's hopper is equipped with cyclonic technology to eliminate any dust emissions. The machine is also fitted with a quick release hopper unloading system.
- The ASC D40's unique build design allows for the vacuum hose to reach 100 metres if required. This makes the ASC D40 the perfect cleaning partner for industries including the aluminium, brick, steel, timber, mining, agriculture, construction and grain industry.
- The ASC D40 can be used to vacuum up both wet and dry material. The ASC D40 excels in sucking up hazardous materials effortlessly.
- Most common uses for the D40 are the extraction of ash, alumina, excrement, gravel, lime, cement, grain and rocks.
- The machine is designed to be used vacuuming tunnels, silos, attics, conveyor belts and elevator platforms.

MAIN ADVANTAGES

- Diesel Powered
- All-in-one system ready to work anywhere anytime;
- Automatic filter cleaning system;
- Fast discharge of debris into disposable bag;

EASE OF USE

Simple to operate and incredibly reliable. The electronics are minimal which allows any operator to use the ASC D40 in a few simple steps.

HIGH PERFORMANCE

The compact size of the ASC D40 does not effect its sucking power over time. The machine has been designed to vacuum materials at a distance of 100 meters.

FLEXIBILITY OF USE

The ASC D40 can be used in any industrial environment. Hopper discharge can be via a separate bag or large skip.

EFFICIENT FILTER SYSTEM

The large capacity filtering surface ensures maximum filtration. A secondary HEPA filter is also fitted ensuring 100% dust capture.

LOW OPERATING COSTS

The latest generation diesel engine guarantees low operating cost. Fuel consumption is considerably less than any equivalent truck mounted VACS.

EASY HANDLING

The twin axle trailer is designed to be easy to transport and fit into tight spaces where other equipment cannot fit. The trailer can be towed by any car, truck or mobile industrial vehicle with a tow ball.

TRAILOR

With a width of 2000 mm the machine is minimally invasive in size. The trailer is fully registable and 'CE' approved. This allows for multi site cleaning minimizing investment expenditure.

LARGE COLLECTION CONTAINER

SIMPLE AND INTUITIVE DESIGN

HEIGHT ADJUSTABLE DRAWBAR
