ASC DS3000

CLEAN-UP MADE EASY

Engineered for continuous-duty operation in manufacturing, mining, cement, and processing industry, the DS3000 is an industrial grade vacuum that effectively collects powdered material and heavy debris such as cement, plasterboard, and fine dust.

The machine comes with a choice of three different filter configurations for a range of applications.

To increase the DS3000's hopper capacity and run time, the machine can be paired with an optional pre-separator unit.

The machine is easy to transport due to its build quality and trolley wheels.

EASY TO USE

The DS3000 can be understood by any operator in seconds.

SIMPLE BIN REMOVAL

Bin removal is made very simple.

EFFICIENT SUCTION

The DS3000 is fitted with a side channel-turbine, giving maximum dust filtration.

FEATURES

- Flexible hose up to 6.6m
- Optional with different dust filters
- Multiple attachments for different cleaning tasks
- Easy to operate
- Heavy-duty stainless steel frame
- Simple bin removal
- Large 100L bin capacity*
- Compact and maneuverable
- Runs on three-phase power or compressed air
- Easy transport due to heavy-duty castor assembly
- Optional oversized hopper for extended run time
- Dust compliant in all industries

PRE-SEPERATOR

The ASC DS3000, with it's optional mobile pre-seperator, allows for an extra hopper capacity.

The unit features a unique tipping function that eliminates back injuries and allows for simple emptying.

Further, the pre-seperator can effectively be used for sucking up liquids and solids simultaneously with an optional liquid level sensor fitted.

EXTENDED RUN TIME

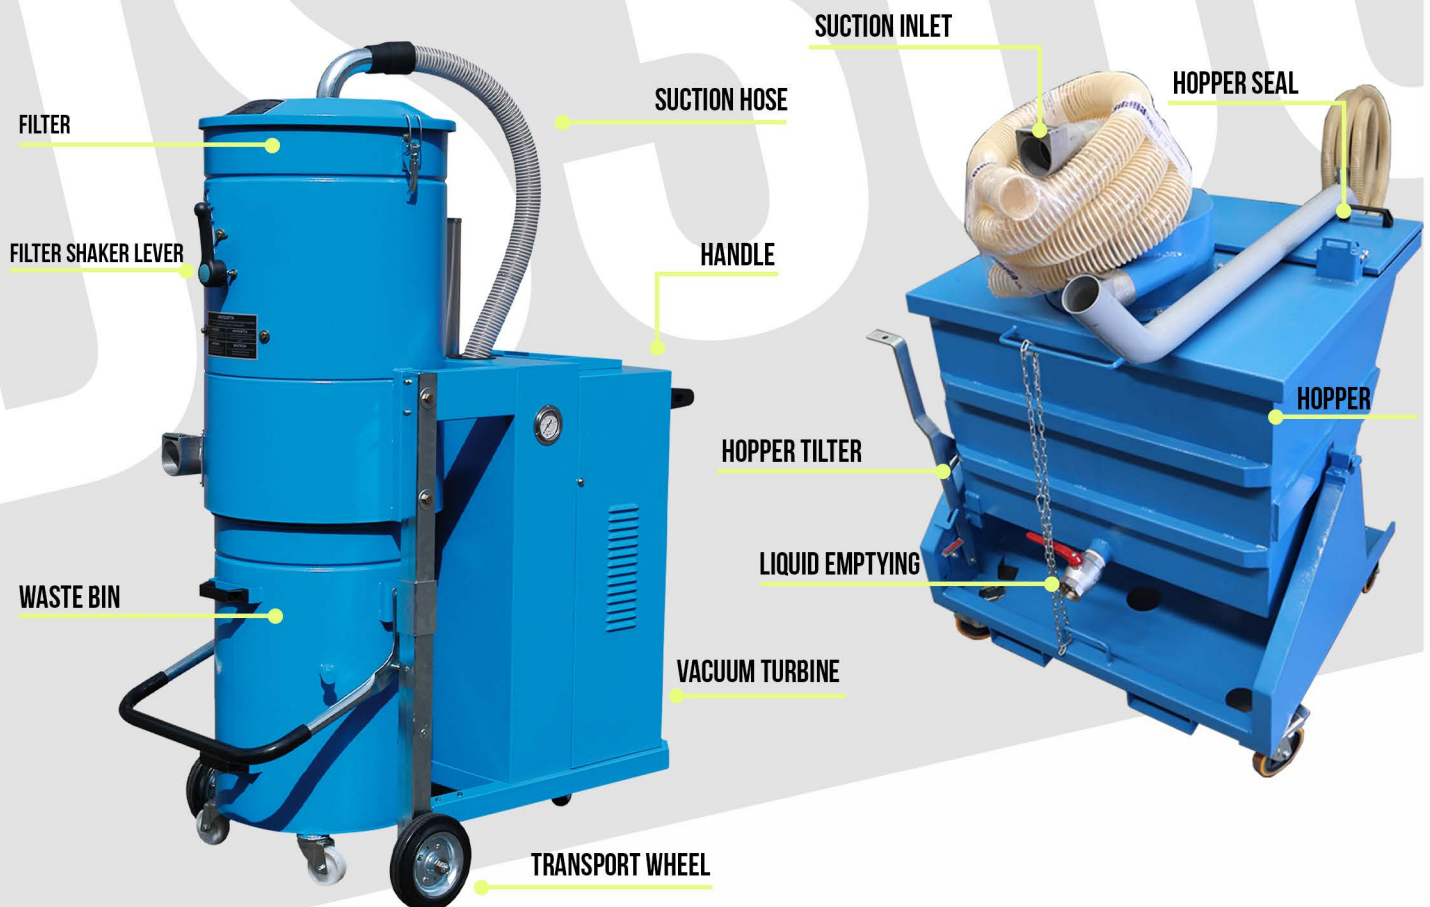

The pre-seperator gives the ASC DS3000 an additional 400L hopper volume, with an optional liquid sucking function, perfect for large factory operations.

TILTING FUNCTION

The machine has a tipping function that simply dumps the waste on the ground for easy emptying.
